

Hobbypaint Heat resistant

Properties

Type: Alkyd priming paint Scandia Hobby Enamel Primer Grey is a quick-drying alkyd priming paint based on special alkyds. The odour from drying alkyd paint may be felt strong/unpleasant. At normal temperatures and humidity the odour will decrease gradually. Provide for good airing and ventilation. Choose alternative water-based acrylic paint that does not give the same odour problems.

Use

Suitable for painting on minor surfaces of metal, e.g. bicycles.

Primer Grey is suitable as rust-protecting paint alone and as pre-treatment for the other hobby enamels on iron.

Suitable both interior and exterior.

The substrate must be clean, dry, solid and suitable for being painted. It must be without any grease, oil, wax and scraps of soap.

Stir the paint well before and apply by brush.

Technical Data

Product Type	Priming paint
Gloss	5;Matte
Density (kgs/l)	1.2
Solids Weight %	43
Nominal spreading rate (m ² /ltr.)	1
Drying time at 20° C, 60 % RH (Hours)	1
Dilution	Should not be diluted
Cleaning of Tools etc.	White spirit
